VSAT Star
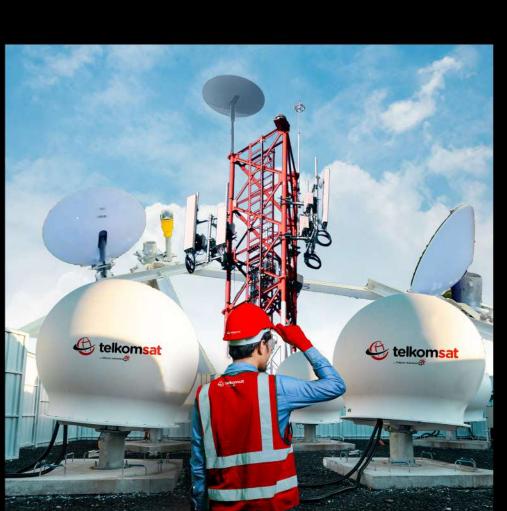

VSAT Star is a LEO (Low Earth Orbit) based communication service connecting the access network with its core network.

TERMINAL KITS

VSAT Star
Services Are Best Suited For:

- Backhaul cellular network which connects RAN (Radio Access Network) e.g. BTS/NodeB/eNodeB to the Core Network.
- Backhaul Network which connects customer network to network of the service provider.
- Backhaul Private IP Network which connects branches to head quarter network.
- Hot backup network for redundancy system in the emergency event.

Advantages:

- Low latency 50 milliseconds (ms) roundtrip (fibre-like).
- Swift service activation.
- Service flexibility tailored to customer needs.
- High reliability supported by orbit redundancy system and ground station redundancy.
- Service Level Agreement above 99%.
- High security level with advance encryption technology.

Features:

- Data speed up to 500 Mbps per node.
- Easy antenna installation for small dimension and light weight of 60 cm in diameter and 5 kg in weight.

Marketing Ofiice:

- Telkom Landmark 2nd Tower 21st floor Jendral Gatot Subroto Road No 52 West Kuningan, Mampang Prapatan, South Jakarta, Indonesia 12710
